Participants' comments:

'I always felt sound and music were an important force, but I never knew really why or how to use it in a conscious way. I realized I didn't listen to certain music because it made me sad.

Arden helped me to take advantage of that and I was able to let go of some very old pain from when my parents divorced'

'I have loved music all my life and have taken many different courses and read lots of books about using it for healing and transformation. This course is the best'

Over 20 pages of student material is included.
